Noise from flight training horrendous and is dangerous someone is going to get killed by airport training or hundreds of people are going to get hurt
 Can't the flight training be done over the ocean, it is dangerous and hundreds of people are going to get hurt
 Here we go again-Noise from flight training is horrendous are you not going to do anything about it. It is dangerous residents are going to get hurt when one of those students crashes.
 Noise from ERAU flight training is nerve racking and the foreigners should be learning to fly somewhere else. He knows who they are because he sees them coming and going from the airport and it is dangerous for them to be allowed to train here.
 Noise complaint regarding flight training since 6:30 this morning
 Plans have been bussing around his house all day.
 Mr. Perna, you may recall that a couple of years ago we exchanged emails about training at night. I note that your aircraft were flying until 11 pm on Monday. Over and over. I suggest that 8 pm is sufficient--don't quote the FAA. Stop it, or we're going to get into another social war. You are insensitive to civic conscientiousness. This is sin, sir. Biblical.
 Fred Amsterdam, JD

Same plan has been circling for two hours.
 "This is ridiculous, they woke me up at 6:55 AM this morning. I don't know how you are able to get away with this."
 They started strafing runs at 715 AM this morning.....low level, high noise and repetitive. Can something be done to stop this abuse?
 We are getting strafed again this morning, continuous low level ft school planes flying across our neighborhoods.....Loud, obnoxious and disturbing.....What is being done to curtail these incessant ft school flights? Gregg Kenney USN (ret)
 RW spoke with Mr Sayyah. He complained that plan were flying over every 20 seconds. RW confirmed that no one in pattern and only 2 planes taking off. Mr Sayyah was extremely rude and repeatedly called RW a liar. RW had to politely end the conversation.
 Plans have been bussing around his house all day.
 "It's a holiday, why are there so many students flying patterns"
 Wednesday, July 04, 2012 (4th of July!, a holiday) @ 12:20 PM several aircraft performing repetitive flight operations. N-number, N3265A of one of the aircraft. In addition to repetitive flying on a holiday these aircraft are taking off from runway 25 when KEVB reports winds from 280 deg @ 5kts. These aircraft should be using runway 29 per, FAA JO 7110.65, Para 3-10-4, Intersecting Runway Separation. 2/14/08 JO 7110.65S
 Runway Selection 3-5-1
 Section 5. Runway Selection
 3-5-1. SELECTION
 a. Except where a "runway use" program is in effect, use the runway most nearly aligned with the wind when 5 knots or more or the "calm wind" runway when less than 5 knots

"This is ridiculous, they have been flying nonstop for four hours now"
 "This is ridiculous, they have been flying nonstop. I call earlier and they are still non stop."
 "when is the City of NSB going to do something about this? Can't they find someplace else to practice?"
 That flight training is legal at 9, 9:30, 10 pm and later does not equate with moral The continuing night nuisance is socially insensitive, indifferent, inappropriate. That it continues manifests a disconnect in any who can separate the legal from right, as in Golden Rule right. Think about it, please.
 "why is a plane using the wrong runway"

Kudos to the thoughtful pilot doing T & Gs in the middle of the night! I cant get the tail # because it's DARK! If you find out who it is, give him a thumbs down from the folks whose homes he is flying over in the dark of night. This is probably the same thoughtful person that does this on a regular basis. After all these years it's evident that you or the city does not give a hoot how we feel about these non paying training flights! I think it's way past time for the city to get behind the resident taxpayers and stop cow towing to the schools!!!!!!

"who is doing flight training all night. Current good neighbor policy is being ignored"

This has been going on for the past two weeks. Repetitive flying well past the voluntary stop time of 10:00 PM. Once again, this is the problem policy that is voluntary. The pilots that disrespect the residents also disrespect the city's request to comply to voluntary policy. Something more must be done so the residents can enjoy rest and sleep in their homes. We live at 1938 Bayview Drive. Last night, 7/17/2012, there were 2 planes > doing touch and goes at 11 pm. Really? They wake us up almost daily often

- > at or before 7am. Who ever is doing this is already uncaring about us
- > residents who live here. To be doing touch and goes after 11 pm is
- > disrespectful and uncalled for the area residents.
- > Please have some respect.

Planes flying over Turnbull Estates
A Phoenix Plan flying barely 100 ft in to land
Aircraft flying very low in circles over their home

Last evening at 10:30, there were multiple aircraft performing training operations over our house when we were trying to sleep. In many instances, these aircraft were only a minute or so apart from each other making for a constant drone. Please contact the schools and find out who is allowing the students to take planes out at this late hour blatantly disregarding noise policies and the welfare of tax paying citizens entitled to peace and quiet in their own homes. This is yet another of the continued examples as to why the voluntary policies do not work.

A twin star flying extremely low....

"When is the City going to do something about this? They were flying till 10-11 last night and started already at 7 this morning."

Distressed over the constant bombardment of aircraft.

It was his understanding that there was to be no flight training on Sundays.

touch & goes since 7:15 this morning. Also, alternating left then right off of 25.

planes are using wrong runway based on wind speed and direction

Two Twin Stars are practically chasing each other, and ridiculously loud staying in the power.

"When is the City going to do something about this?"

"Planes are quiet all day and they right at dinner time the wont stop buzzing over head. It is putting NSB residents at risk"

"When is the City going to do something about this?" "I cant even enjoy my diner or hear my TV in the kitchen for the planes buzzing overhead. "

"9 planes in 6 minutes is too much" then she hung up on me

I awoke this morning at 7 am to a plane buzzing our house in Isleboro. It is now 10:45 pm and a plane is circling. Aren't their hour boundaries they must abide by like 8 am and 10 pm?

"Epic & Embry are ignoring the agreement by flying prior to 8 in the morning"

"planes have already started this morning. It is ridiculous that I am awaken this earlier by planes flying overhead"

"this is ridiculous, since 7am. Is the city waiting for one of these planes to crash into the homes over here before they do something?"

"This is a calamity. Planes flew until 11:15 PM last night and started up again at 7:20 AM this morning. Please call me"

The flight control tower is not following FAA regulations. I still have not received a response from my last complaint.

All day Sunday Embry Riddle was flying. Didn't think they are supposed to fly on Sundays. this is ridiculous

these planes are going crazy today, give us a break!

this is a bit ridiculous, these damn planes

airplanes flying overhead

Tuesday, October 09, 2012 @ 8:40 PM. Training aircraft have been using runway 7/25 for repetitive touch and go operations over the past hour. KEVB reports winds from 30 deg @ 10 kts. These aircraft should be using runway 2/20 per the following FAA regulation,FAAO JO 7110.65, Para 3-10-4, Intersecting Runway Separation.

woke up by foreign people flying over our homes

it was my understanding that flight school wasn't to operate on Sundays

"I just don't understand why they have to be so repetative. I can even have my windows open on a nice day"

very irrate today. Said the city is waiting for another disaster like the Deland Publix incident.

Said that the city just blows him off.

same ol same ol, they flew till 11:00 pm last night and they are at it again.

"something needs to be done about this. They have been dive bombing our neighborhood since 9am this morning."

There's a very noisy single engine plane that is flying low over my house at 10:30 am friday morning. It's in a pattern that takes it out toward the beach then north, back past the airport then over my house again and again. I was trying to take a nap but it woke me

"an Embry Riddle planejust flew over my house and deliberately revved his engines. This is ridiculous."

"they have been going at it all day long. We cant even enjoy our diner on a Saturday evening."

"they have been dive bombing my house all day"

"this is ridiculous"

"this is ridiculous"

"planes started Saturday morning at 7AM"

planes are driving us nuts, they have been going since 8:30 this morning

"Epic & Embry have bee3n bombarding me all morning, even woke me up. I don't understand why that are use 25 and bearing to the left"

this is ridiculous, they arent even supposed to be flying on Sunday. I need to know when the next noise abatement meeting is.

I WANT TO FILE A COMPLAINT

A Twin engine plane with blue on the bottom of its fuselage had landing gear down as if readying to land, flew low oever my house. I have seen this plane flying low on other occasions.

they are at it again

Happy Thanksgiving. Here to visit my Mom. The flights started this morning at 7:10 am. I thought you were going to put an 8 am cap on this?

they have been ridiculous, I thought they werent supposed to fly on Sunday

It is 9:25 pm on Jan 10th the "new year". And are you kidding me? no I cannot report the plane number or how it looks, as it is dark. The idiot is flying round and round, causing our dog to bark, kids up, Trust me, if I could sell our home and say good riddance to the noise I would. When we moved here 9 years ago we knew we were close to the airport, but nothing like this then! Thanks for me so regretting moving to NSB!

Approaching airport, circling then flying directly over residential area repeatedly. Is this training, VCSO or Mosquito Control? It is very annoying and loud. What time are they required to stop? It has happened as early as 4 a.m. also (and I did not see any lights to indicate law enforcement scanning the area). Thank you

Okay it is now 10:12 pm on Thursday night and the same, I repeat same, plane is buzzing round and round and again. I really thought things were getting better as a compromise, but a week work/school night again at this hour? They can't fly out over the ocean? PLEASE!!!

they've been at it for the past 20 minutes, non stop. Its like they are dive bombing our homes it is non stop. I have to keep my windows and doors closed.

"too damn low, and too damn loud. Not flying with any consideration of the people beneath them."
